San Clemente, Calif., March 27, 2019 – Soul Community Planet (SCP) today unveiled SCP Commons, the second holistic hospitality concept to debut from the company. Co-located within SCP Colorado Springs, the 2,300 square-foot SCP Commons provides all of the necessary infrastructure freelancers, solopreneurs and digital nomads need to collaborate and be highly productive. SCP Commons offers a generously-sized communal workspace, private conference room, along with 24/7 access to the state-of-the-art SCP Fit fitness center, outdoor pool and other amenities and discounts.

“The vision of Soul Community Planet is to make the world a better place by serving those who value personal wellness, social good and the environment. SCP Commons supports our vision by providing mobile professionals and entrepreneurs with a welcoming, eco-friendly place to work,” said Soul Community Planet Co-Founder and CEO Ken Cruse. “The appeal of SCP Commons is enhanced by its co-location with the SCP Hotel and SCP Fit, giving members access to world-class amenities, healthy, vegan-forward food choices, and top-notch fitness.”

According to the US Bureau of Labor Statistics, 40% of the US workforce will be freelance by the year 2020. This, along with a growing demand for the mobile workforce to find social, collaborative environments to work, has been driving the demand for new creative coworking spaces.
